

REUSABLE SPACERS

RUS15200

Reusable Spacers are ideal for spacing and aligning marble, granite, stone, and large format tile installations. They are engineered to produce a consistent 1.5mm grout joint, and to quickly and easily space and align horizontal and vertical tile. They are injection moulded for dimensional accuracy and do not compress under heavy loads, making them especially helpful in vertical installations. They are easy to clean and reusable on future projects.

MULTI-USE

Use with both floor and wall tiles

LARGE TILES

Ideal for large tiles aligning marble, granite, and stone

CONSISTENT

Injection moulded for uniform grout spacing tile installation

EASY

Easy to use, remove, clean and reuse
