

LASH PLIERS

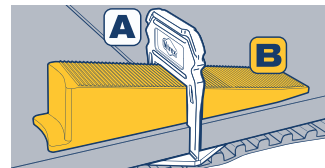

LASHPL

The Vitrex LASH Pliers offer the ideal amount of force when tightening our Tile Leveling Wedges into the Tile Leveling Clips. These have been specially designed to make installation on large jobs faster and easier rather than doing it by hand. Compatible with both the standard LASH and LASHXL.

LEVEL & ALIGN: Automatically align the tiles, ensuring that the tile surface is level.

SPACE: Evenly spaces tiles to prevent joint variation

HOLD: Wedges hold tiles at an even height until the adhesive sets.

PERFORMANCE

Stop pins allows proper pressure for clips

COMFORTABLE

Rubberised and textured grip for long term use

EASY STORAGE

Metal clip holds the handles together when not in use

VERSATILE

Removable protective caps to accommodate different systems
