

PROFESSIONAL TILING TROWEL - NOW UPGRADED

102906NP 102909NP 102957NP 102970NP 102971NP

The Vitrex Xtreme Professional Trowels have been upgraded for enhanced comfort and performance. They retain the robust nine-rivet design on an extended aluminium shank, now with two reinforced rivets for added strength—minimising the risk of breakage during even the toughest installations. An increased handle-to-shank distance provides greater hand clearance, improving ease of use and overall comfort. Each trowel also features a rust-resistant stainless steel blade and is available in a range of notch sizes to suit various applications. Enhanced aesthetics with QEP branding woven into the handle and premium laser etching on the blade.

COMFORTABLE

Profiled handle with non-slip rubber grip for repeated use

RESILIENT

Nine-rivet extended shank which includes two reinforced rivets for strength

DURABLE

Rust resistant stainless steel blade

STURDY

Extra handle-to-shank distance allows hand clearance

LASER ETCHING

Enhanced branding and notch size identification
